Sample Script (Make sure to include #1 and #6 in your calls!)

1. Hi, My name is _____ and I'm calling about immediate medical care needed for Leonard Peltier, whose prisoner number is **89637-132**, and he's in USP Coleman.
2. Leonard Peltier has suffered a significant loss of vision which poses serious risks, like him falling, and he now depends on other prisoners to be able to perform basic activities.
3. Leonard has not seen an eye doctor in over 12 years nor a dentist in over 10 years.
4. The Bureau of Prisons must immediately tend to Leonard's current medical needs, or they violate the American Disabilities Act (ADA)* and violate Leonard's 8th Amendment right against cruel and unusual punishment.
5. The BOP must provide preventative medical treatment when not doing so could cause significant and severe health concerns.
6. - Leonard's blindness can be prevented or treated, and the BOP must provide immediate medical care to do that
- Leonard has a hard time eating, and the BOP needs to provide immediate and adequate dental care.
- Leonard is at risk of falling and he needs treatment and accommodations, so he is not dependent on other prisoners to do basic things.

Please do everything you can to get Leonard Peltier immediate, ethical, and proper medical treatment!

A little more Background:

** ADA requires accommodations for a person with any form of disability.*

Throughout his incarceration, Bureau of Prisons medical neglect has caused Leonard permanent physical damage which could have been avoided by providing timely and proper medical care.

For instance:

- In 1986, Leonard suffered a stroke which resulted in him losing 80% of the vision in his left eye. When International doctors were allowed in to examine him, they concluded this could have been easily avoided if Peltier received regular timely medical care.*
- In 1996, Leonard Peltier had two surgeries to treat his two abscessed teeth. He nearly died from blood loss, was kept in solitary confinement during "recovery," and ultimately suffered permanent damage to his jaw.*
